MASTERBATCH PLASTIC POLYMER

Introduction

Shubh Labh is a Manufacturer of black & colored masterbatch located at Kotambi, Vadodara (Gujarat) India, committed to deliver Superior Color Solutions for Plastic processing.

We at **Shubh Labh** believes in timely delivery and complete customer satisfaction by production of high performance polymer masterbatches using high advance twin screw extruder & precision dosing system.

Our team of experts working round the clock to maintain the quality parameters through strict process control & continuous R&D, we ensure excellent dispersion color consistency & processing stability.

“ **Compounds and Masterbatch Solutions
For The Plastic Industry** ”

MASTERBATCH PLASTIC POLYMER

Our Product Range

Black Masterbatch

We deal with masterbatch ranging from 10-60% carbon black loading used in an extensive range of products due to its properties like UV Protection, jetness. Its high surface area increases with decrease in particle size which makes it one of the most highly preferred types of masterbatch. We deal with masterbatch of particle size ranging from 10 to 20 mm.

Colour Masterbatches

Color is carefully sculpted rather than simply applied granules. We offer high grade colored granules to help you achieve your desired shade with ease.

Unleash the possibility of vibrant colors with our high quality color masterbatches customized to fit all your requirements.

Additionally, our color masterbatches offer added functional properties of UV stability and excellent dispersion, ensuring that your products stand out both in appearance and performance.

Contact us today to take your plastic products to the next level with our color Masterbatches.
